Key Performance Indicator (KPI) Descriptions

Average Time to See Provider: This metric is the average time in minutes it takes between a patient being admitted to the time they first saw the provider (e.g., nurse, doctor, or clinical specialist, target goal of 600 minutes across all hospitals).

Patient Satisfaction: This is the rating patients give to reflect the care provided during their length of stay.

Patient Readmission Rate: This is the number of patients who were re-admitted back to the hospital during a 30-day period.

Average Hospital Length of Stay: This metric is the average time in days between a patient being admitted to the time they were discharged.
